EDUCATION

Boston University Boston, MA
Master of Science in Computer Science (Artificial Intelligence) *Expected 2027*
Current Coursework: Mathematical Foundations of Data Science, Foundations of Programming and Systems, AI in Industry Series

Ghulam Ishaq Khan Institute of Engineering Sciences and Technology (GIKI) Topi, Swabi, Pakistan
Bachelor of Science in Artificial Intelligence *June 2025*
Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Computer Networks, Computer Vision, Machine Learning, Deep Neural Networks, Natural Language Processing, Reinforcement Learning, Generative AI, Software Engineering

EXPERIENCE

Marketing & SEO Intern June 2023 – August 2023
Silverant Marketing

- Supported digital marketing and SEO activities through research and content-related tasks.
- Researched SEO practices and online visibility, using online data to inform marketing initiatives.

PROJECTS

Data Science Job Matcher | Python, NLP, RAG, LangChain, ChromaDB GitHub repository

- Built an AI-powered job-matching application that analyzes resumes and retrieves relevant opportunities from 3,000+ data science job listings.
- Implemented semantic retrieval with embeddings, LangChain, ChromaDB, and Ollama to match resumes to jobs.
- Built an LLM-powered career-guidance chatbot over retrieved resume and job data, combining document processing, semantic search, and LLM generation into an end-to-end AI system.

NeuroScan AI | Python, TensorFlow/Keras, VGG16, Grad-CAM, RAG GitHub repository

- Developed a VGG16 transfer-learning model to classify brain MRI scans across multiple tumor categories.
- Implemented Grad-CAM to visually explain predictions by highlighting influential regions in MRI scans.
- Integrated a local RAG chatbot (Ollama, ChromaDB) to explain model predictions, combining deep learning, explainable AI, and RAG into an end-to-end AI solution.

TECHNICAL SKILLS

Programming: Python, C/C++
AI/ML: Machine Learning, Deep Learning, Computer Vision, NLP, Generative AI, Transfer Learning, Explainable AI, Reinforcement Learning
LLM Systems: RAG, LangChain, Ollama, ChromaDB, Embeddings, LLM Applications
Libraries: TensorFlow, Keras, Scikit-learn, Pandas, NumPy, OpenCV, Matplotlib
Development: Flask, FastAPI, REST APIs, HTML/CSS
Data & Tools: Power BI, Git, GitHub, LaTeX, Overleaf, VS Code

CERTIFICATIONS

GenAI Job Simulation — Forage | July 2026

- Completed practical tasks in data extraction, data analysis, and building an AI-powered financial chatbot.
